EXAMINER'S AMENDMENT

1. The application has been amended as follows:

a) Replace the abstract with the following:

--In an ink-jet apparatus employing an ink-jet head having a plurality of heaters corresponding to one ink ejection opening and performing printing by ejecting an ink from the ink-jet head, timings of bubble forming are mutually shifted at respective heaters of the plurality of heaters upon application of respective pulses to the plurality of heaters and based on information relating to an ink temperature of the ink-jet head. The ejection amount can be controlled by forming bubbles in the ink to eject the ink through the ink ejection opening.--

b) In claim 47, insert --each of-- before "the" in line 3 and change "timing" to --timings--, and change "the" to --an-- after "based on" in line 4.

Reasons for Allowance

2. The primary reason for the allowance of claims 9, 12 and 13 is the inclusion of the limitations of: driving means being capable of mutually shifting timings of bubble forming at respective heaters of the plurality of heaters upon application of respective pulses to the plurality of heaters, based on a basis of information relating to an ink temperature of the ink-jet head. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.
